

Education and Unemployment Datasets Nutrition Label

Education Rates Dataset:

Created By: National Center for Education Statistics (NCES)

Who Is In This Dataset?: This dataset is based off of a general information survey and the responses are from United States citizens.

Data Time Range: 1970 - 2020

At A Quick Glance: This dataset looks at rates of enrollment in degree granting postsecondary institutions, in a state by state format.

Potential Ways to Use This Data

- Identify different trends regarding education over time
- Examining Educational Policy Impact
- Analyzing Educational Spending Impacts
- Identify states with high college attendance but low completion rates and explore potential reasons

Unemployment Rates Dataset:

Created By: United States Census Bureau

Who is in this dataset?: The data is based on a sample and subject to sampling variability, and is representative of United States Citizens.

Data Time Range: 1970 - 2020

At A Quick Glance: This data looks at unemployment rates in a state by state format - this dataset also covers some useful details about employment status - such as job type - industry - percentage of people with families - and other details to create a fuller picture of that state's demographic.

Potential Ways to Use This Data:

- Identify areas that may be experiencing economic growth or decline.
- Identify different trends regarding employment over time
- Examine the relationship between income inequality and employment rates
